LIST OF CONTENTS

NUMBER 1

	i	Announcement
T.-C. Cheu	1	Procedures for shape optimization of gas turbine disks
K. K. Tamma and S. B. Railkar	5	Evaluation of thermally induced non-Fourier stress wave disturbances via tailored hybrid transfinite element formulations
B. F. Song and Y. S. Feng	17	The influence of failure mode order on structural system reliability
T. S. Butalia, T. Kant and V. D. Dixit	23	Performance of heterosis element for bending of skew rhombic plates
J. Jirousek and M. N'Diaye	51	Solution of orthotropic plates based on p-extension of the hybrid-Trefftz finite element model
S. S. Seleim and J. B. Kennedy	63	Imperfection sensitivity of stiffened cylinders subjected to external pressure
L.-W. Chen and L.-Y. Chen	71	Thermal buckling analysis of laminated cylindrical plates by the finite element method
K. M. Liew, K. Y. Lam and S. T. Chow	79	Free vibration analysis of rectangular plates using orthogonal plate function
J. L. Meek and S. Loganathan	87	Geometric and material non-linear behaviour of beam-columns
G. J. Turvey and M. Salehi	101	DR large deflection analysis of sector plates
B. A. Halabieh and W. K. Tso	113	Simplified procedure for lateral load inelastic analysis of framed-tube structures
M. S. Kuczma and R. Świtka	125	Bending of elastic beams on Winkler-type viscoelastic foundations with unilateral constraints
T. K. Datta and A. K. Jain	137	Response of articulated tower platforms to random wind and wave forces
Y. W. Kwon	145	Simplified finite element analysis of double cantilever beams
M. S. Williams and P. Waldron	151	Longitudinal stress wave propagation in an unbonded prestressing tendon after release of load
W.-J. Wu and C.-K. Chen	161	Transient response of a spiral fin with its base subjected to a sinusoidal form in temperature
A. K. Jemah and F. W. Williams	171	Compound stayed column for use in space

Technical Notes

R. D. Cook 179 Finite element analysis of closely-coiled helical springs

K. Kanaka Raju, N. Rajasekhara Naidu and **G. Venkateswara Rao** 181 Stability of moderately thick annular plates under uniform internal load

I Software Survey Section

NUMBER 2

i Announcement

A. Raman 185 A non-iterative method of structural optimization for static, dynamic and response problems

N. R. Iyer and **T. V. S. R. Appa Rao** 191 Studies on stress concentration at shell–column junctions of hyperboloid cooling towers

G. Jayaraman, P. Chen and **V. W. Snyder** 203 Free vibrations of rectangular orthotropic plates with a pair of parallel edges simply supported

N. Krishnamurthy and **D. P. Thambiratnam** 215 Finite element analysis of column base plates

A. Shirazi-Adl and **S. C. Shrivastava** 225 Large deformation finite element treatment of changes in the volume of fluid-filled cavities enclosed in a structure

W. M. G. Courage, P. J. G. Schreurs and **J. D. Janssen** 231 Estimation of mechanical parameter values of composites with the use of finite element and system identification techniques

T. Iwakuma 239 Timoshenko beam theory with extension effect and its stiffness equation for finite rotation

M. G. Kittur and **R. L. Huston** 251 Finite element mesh refinement criteria for stress analysis

A. S. Nazmy and **A. M. Abdel-Ghaffar** 257 Three-dimensional nonlinear static analysis of cable-stayed bridges

Huang Dao-an 273 A general solution of the orthotropic continuous rectangular plate

F. Tin-Loi, V. A. Pulmano and **D. Thambiratnam** 281 BEF analogy for axisymmetrically loaded cylindrical shells

S. N. Patnaik and **H. G. Satish** 287 Analysis of continuum using boundary compatibility conditions of Integrated Force Method

J. R. Xie, Y. Z. Chen and **D. Ho** 297 Axisymmetric buckling of truncated shallow spherical shells

S. Elangovan	303	Analysis of funicular shells by the isoparametric finite element
Y. T. Hsu, C. C. Fu and **D. R. Schelling**	313	An improved horizontally-curved beam element
G. Muscolino	319	Analytical evaluation of structural response for stationary multicorrelated input
Z.-H. Zhong and **L. Nilsson**	327	A contact searching algorithm for general 3-D contact-impact problems
C. J. Chen, R. M. Gutkowski and **J. A. Puckett**	337	B-spline compound strip analysis of stiffened plates under transverse loading
D. G. Mangsuli and **V. Ramamurti**	349	Lanczos method applied to the solution of eigenvalue problems of cyclic symmetric structures
	I	Software Survey Section

NUMBER 3

	i	Announcement
B. W. R. Forde, R. O. Foschi and **S. F. Stiemer**	355	Object-oriented finite element analysis
T. A. Stone, J. L. T. Santos and **E. J. Haug**	375	An interactive pre-processor for structural design sensitivity analysis and optimization
S.-C. Lee and **C.-K. Chen**	387	Finite element solution for turbulent forced convection between parallel plates
S. A. Al-Kaabi and **G. Aksu**	395	Free vibration analysis of Mindlin plates with parabolically varying thickness
L. Szabó	401	Tangent modulus tensors for elastic–viscoplastic solids
S. Y. Lee and **H. Y. Ke**	421	Free vibrations of non-uniform beams resting on non-uniform elastic foundation with general elastic end restraints
C. Militello and **C. A. Felippa**	431	A variational justification of the assumed natural strain formulation of finite elements—I. Variational principles
C. Militello and **C. A. Felippa**	439	A variational justification of the assumed natural strain formulation of finite elements—II. The C^0 four-node plate element
A. K. Jain	445	Inelastic response of reinforced concrete frames subjected to the 1985 Mexico earthquake

M. N. Viladkar, P. N. Godbole and **J. Noorzaei**	455	Some new three-dimensional infinite elements
R. C. Kar and **T. Sujata**	469	Parametric instability of an elastically restrained cantilever beam
R. R. Wakefield and **F. Tin-Loi**	477	Mathematical programming and uniqueness in non-holonomic plasticity
G. Deshmukh and **M. Pecht**	485	A modified Powell method for six-degrees-of-freedom platform kinematics
L. Yang and **L. Y. Ye**	493	Study of the behavior of a composite multi-bolt joint
J. H. Choi and **K. K. Choi**	499	Direct differentiation method for shape design sensitivity analysis using boundary integral formulation
M. R. Taheri and **E. C. Ting**	509	Dynamic response of plates to moving loads: finite element method
	I	Software Survey Section

NUMBER 4

	i	Announcement
N. Paydar and **G.-J. Park**	523	Optimal design of sandwich beams
C. W. Chang	527	Cartesian-based control of a deformable robot manipulator
M. Gorji and **A. R. Akileh**	537	Elastic–plastic bending of annular plates with large deflection
G. Shi and **S. N. Atluri**	549	Active control of nonlinear dynamic response of space-frames using piezo-electric actuators
G. Karami, M. Farshad and **M. R. Banan**	565	Spatial buckling of arches—a finite element analysis
S. Pala and **G. Özmen**	577	Lateral load analysis of multi-storey structures considering axial deformations
Z. Ji and **K. Yeh**	585	General solution for nonlinear buckling of non-homogeneous axial symmetric ring- and stringer-stiffened cylindrical shells
S. D. Garvey, J. E. T. Penny and **A. J. Gilbert**	593	The reduction of computation effort in Kron's methods for eigenvalue and response analysis of large structures
I. Senjanović and **Y. Fan**	603	On modelling of thin-walled girders and accuracy of vibration analysis performed by the finite element technique related to ship structures

H.-F. Yeh and **B. Dopker**	615	Deformation mode selection and mode orthonormalization for flexible body system dynamics
Y.-S. Feng	629	Unified optimal criterion method—combination of direction of gradient and ejection line
M. B. Wong and **F. Tin-Loi**	633	Geometrically nonlinear analysis of elastic framed structures
M. B. Wong and **F. Tin-Loi**	641	Analysis of frames involving geometrical and material nonlinearities
W. Zhang	647	Computation of stress fields in unidirectional n-phase fibrous composites under longitudinal and transverse loads
W. M. Lucking, S. V. Hoa and **T. S. Sankar**	655	A boundary collocation method for stress analysis of laminate edges
D. Gu	663	Calculation in the unsymmetrical bending problem of thin plates by spline boundary layer method
N. Ganesan and **K. R. Sivadas**	669	Free vibration of cantilever circular cylindrical shells with variable thickness
		Technical Notes
A. E. Anuta, Jr	679	The modal equations in relativity
P. R. Heyliger	681	Boundary singularities in the Laplace equation by enriched finite elements
	I	Software Survey Section

NUMBER 5

	i	Announcement
J. Padovan and **D. Gute**	685	Multi-level Hierarchical Poly Tree computer architectures
C. P. Pantelides	715	Computer-controlled structures
R. J. Yang	727	Design modeling considerations in shape optimization of solids
S. A. Georgiadis, G. E. Stavroulakis, E. K. Koltsakis and **P. D. Panagiotopoulos**	735	Interfacial debonding in composites via mathematical programming methods; the material inclusion problem for lubricated and non-lubricated interfaces
A. Safjan	753	Some advances in reduction methods for nonlinear structural statics
R. Prasad and **N. K. Samria**	765	Heat transfer and stress fields in the inlet and exhaust valves of a semi-adiabatic diesel engine

N. K. Samria and **R. Prasad**	779	A generalized solution for transient temperature distribution in an internally/externally insulated cylindrical shell
R. Prasad and **N. K. Samria**	787	Transient heat transfer analysis in an internal combustion engine piston
	I	Software Survey Section

NUMBER 6

	i	Announcement
M. Mukhopadhyay and **A. Mukherjee**	795	Finite element buckling analysis of stiffened plates
C.-L. Liao and **J. N. Reddy**	805	Analysis of anisotropic, stiffened composite laminates using a continuum-based shell element
A. A. Khdeir and **J. N. Reddy**	817	Influence of edge conditions on the modal characteristics of cross-ply laminated shells
K. Y. Lam and **K. C. Hung**	827	Orthogonal polynomials and sub-sectioning method for vibration of plates
K. K. Tamma and **R. R. Namburu**	835	Applicability and evaluation of an implicit self-starting unconditionally stable methodology for the dynamics of structures
M. O. Al-Hunaidi	843	A new procedure for evaluating the time domain boundary influence matrix of unbounded media
Z.-J. Zeng and **R.-Y. Cai**	855	Treatment of singular integral caused by employing linear boundary elements for two-dimensional elastostatic problems
K. S. Surana and **G. Abusaleh**	861	Curved shell elements for heat conduction with p-approximation in the shell thickness direction
		Technical Note
R. Ben-Zvi	881	A simple implementation of a 3D thermo-viscoelastic model in a finite element program
	I	Software Survey Section
